

Paraprofessional Subs Needed

If you are interested in becoming a substitute paraprofessional please contact Batavia Public Schools' Human Resources Department so that you can complete the sub application packet. At this moment our district has a very shallow pool of paraprofessional substitutes. The work that paraprofessionals do is vital not only to the development of children with disabilities, but also to the broader functioning of our schools. When we are unable to fill a paraprofessional position the results can be very disruptive. Therefore, if you are interested in subbing or know people who could be viable substitutes please either apply or encourage others to do so. In order to be a substitute paraprofessional the district would prefer that the applicant meet the NCLB requirements of 30 hours of college credit or passage of the Paraprofessional Skills Test but will accept individuals with a high school diploma and a responsible demeanor.
